Analytical Approach

Ind-Ra continues to take a standalone view of IFIN to arrive at the rating.

Detailed Rationale of the Rating Action

The affirmation reflects IFIN's continued delays in debt servicing since September 2018.

List of Key Rating Drivers

Weaknesses

- Delayed debt repayment

Strengths

- None

Detailed Description of Key Rating Drivers

Delayed Debt Repayment: The ratings continue to reflect IFIN’s missed payments on contractual debt obligations. The IL&FS group is functioning under a resolution framework wherein payments are made mostly to meet operational expenses to ensure the going concern status of the company. The group remains in a cash conserving mode while making efforts towards asset monetisation.

Liquidity

Poor: IFIN has been in continuous default since September 2018, and the liquidity is poor.

Rating Sensitivities

Positive: Timely debt servicing for at least three consecutive months could result in a positive rating action.

ESG Issues

ESG Factors Minimally Relevant to Rating: Unless otherwise disclosed in this section, the ESG issues are credit neutral or have only a minimal credit impact on IFIN, due to either their nature or the way in which they are being managed by the entity.
